1. Introduction to Fuckemoon project

After Dodge coin with its meme and strong community we consider a political satire can also be presented to the crypto community.

To freely express one's political idea majority of people relies on World Wide Web which already became a gigantic waste dump and individual thought and opinion on political issues can not be well stood out there with all the fake news and noises.

The crypto community is relatively new however its enthusiasts thrive and this opens new opportunities to those who seek their freedom of expression on certain political issue without risking their life, loss of job and the fear of wrongfully accused.

This project also seeks a political satire much like Doge meme coin and the freedom of expression on certain political ideas and criticism without being wrongly charged.

2. The Problem you're solving

The problem we are trying to solve is to replace forged and media influenced public opinion poll which only reinforces political majority and their sponsors with the crypto token we have issued on blockchain.

The irrevocability of blockchain helps us to permanently incave our ideas on certain political issue to blockchain and to trade the token like any other crypto currency to get public attention and their active participation on the issue.

With the value of the token we could contribute it to deal with the issue and could fund some activities which address directly to the issue.

3. Value proposition/solution

The project intended to keep the anonymity of the supporters of a political issue which may be controversial in nature and thus lead them to social scrutiny or even to blame game.

The rise and fall of the token value also represents the continuance and the urgency of dealing the issue. As long as its value sustained public concern on the issue persists and the interest of public revives

The token speaks out to the world that there are a lot of people who opposes Moon Jae-In and his radical supporters called themselves as "Daekkemoon"

The token expresses this opposition more satirical way to get public attention and interest and that would eventually get more public attention as the value of the token inflates.

Once traded on crypto DEX(Decentralized Exchange) this token would get more public attention on this opposition and public would buy the token to express their supports on the idea of the token.

4. Quick market figures

The token is exactly like anonymous public poll on certain political or social issue among crypto community. If the issue gets its public awareness the token which favors the issue gets its value risen or fallen which opposes the issue.

5. Fuckemoon(FUCKEM) Token – a BEP20 token

Fuckemoon(FUCKEM) token is the satirical expression which opposes current political leader and the president of the republic of Korea, Moon Jae-In and his radical political supporters called "Daekkemoon".

Fuckemoon(FUCKEM) token is also BEP20 token and issued on Binance smart chain platform to criticize Moon and his radical supporters pro CCP political stance.

The detail of the token is described as follow.

> Name: FuckeMoon
> Symbol: FUCKEM
> Total supply: 210,000,000,000
> Blockchain: Binance Smart Chain

6. Team and Vision

The identity of the token team can not be revealed because of the public scrutiny and blame on those who oppose Moon and his radical supporters however the team includes IT experts and renowned political commentator.

As long as the public sentiment against Moon Jae-In and his radical supporters called themselves as "Daekkemoon" exists the token will be available as well for the public to express their concern on the political mess that Moon and his radical supporters created.

Moon Jae-In has his radical Red guard, Daekkemoon but those who oppose him have Fuckemoon(FUCKEM) token, right?
